### Python For Loops

```
a = ["Geeks", "for", "Geeks"]
for i in a:
    print(i)
```

```
Geeks
for
Geeks
```

### Loop Through String

```
s = "Geeks"
for i in s:
    print(i)
```

```
G
e
e
k
s
```

### range() Method

```
for i in range(0, 10, 2):
    print(i)
```

```
0
2
4
6
8
```

### Control Statements

```
for i in 'geeksforgeeks':
    if i == 'e' or i == 's':
        continue
    print(i)
```

```
g
k
f
o
r
g
k
```

### Break Statement

```
for i in 'geeksforgeeks':
    if i == 'e' or i == 's':
        break
print(i)
```

```
e
```

### Pass Statement

```
for i in 'geeksforgeeks':
    pass
```

### Else Statement

```
for i in range(1, 4):
    print(i)
else:
    print("No Break\n")
```

```
1
2
3
No Break
```

### Using Enumerate

```
b = ["eat", "sleep", "repeat"]
for i, j in enumerate(b):
    print (i, j)
```

```
0 eat
1 sleep
2 repeat
```

### Nested For Loops

```
for i in range(1, 4):
    for j in range(1, 4):
        print(i, j)
```

```
1 1
1 2
1 3
2 1
2 2
2 3
3 1
3 2
3 3
```
